

Assignment 2 Rough ideas:

Draw Kirby like the opening for Kirby's Adventure (figure out a way to include mouse or keyboard input (Start the animation?? Skip the animation??? Will need to think about this one more if i decide to do it, but it will most likely involve taking inputs from keyboard))

Reference:  Kirby's adventure opening / How to draw Kirby

Draw out band logo as keys are pressed on keyboard (most likely a simple logo like Korn)

Draw out 2 swords clashing (Maybe like the buster sword and Masamune, maybe also animate them when mouse is clicked)

Draw an apple and make it spin, maybe make it follow the mouse cursor, (im assuming theres something that lets you track the mouse cursor with C#.) (maybe not this one 400x400 is too small to have anything follow the cursor without making the object extremely tiny)

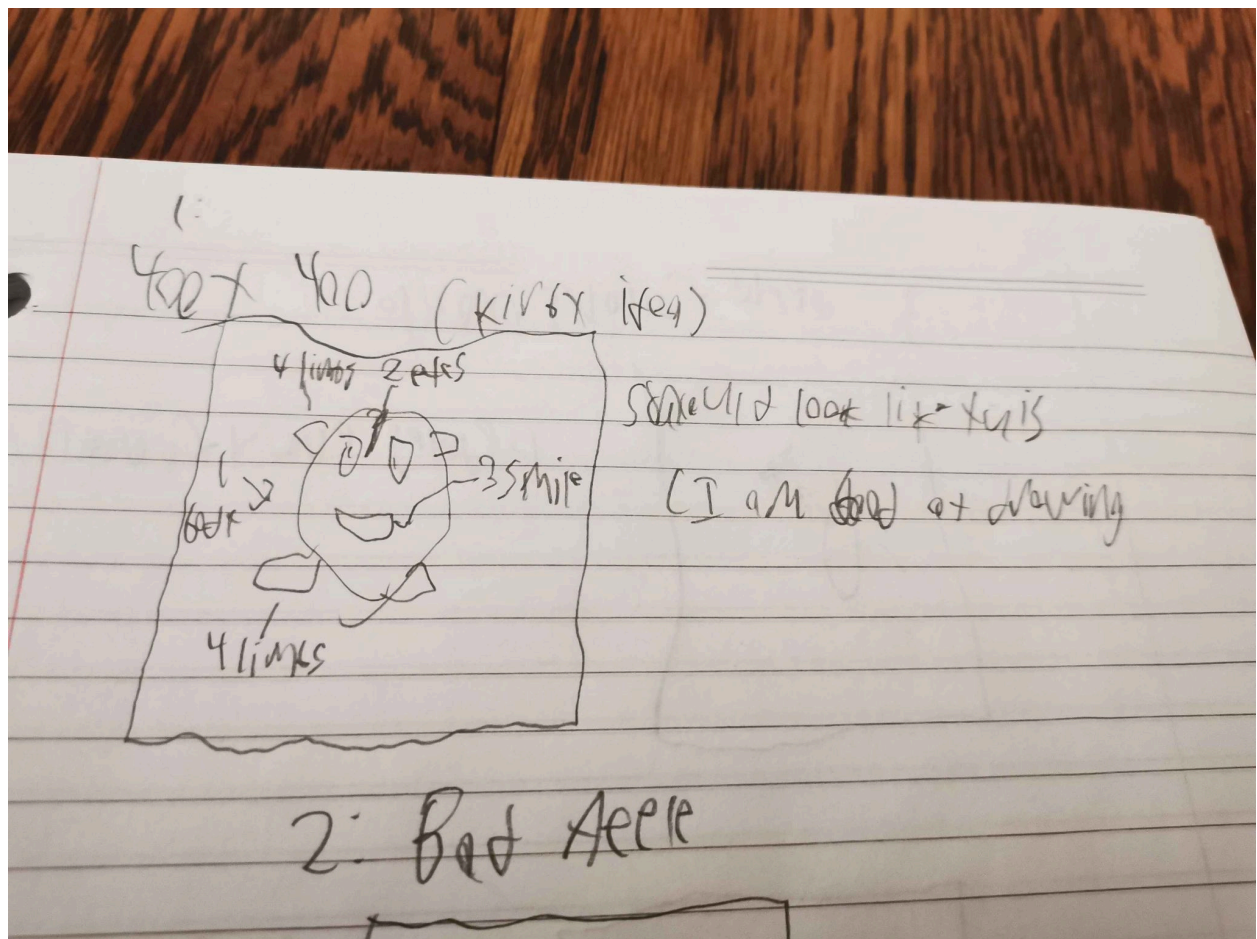

Maybe have a rough shape that switches background color and shape color like the bad apple music video (will definitely need to add a delay on when you can change colors to prevent extreme flashing lights)

Reference:  【東方】Bad Apple!! P V 【影絵】

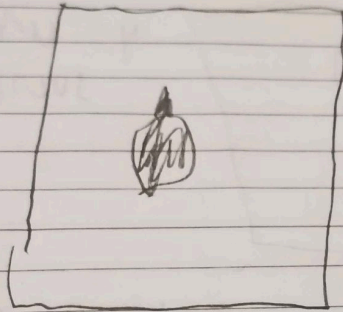

Recreate Undertale Battle box (draw heart in center, have arrow keys move the heart around, key press switches soul mode (gameplay style))

Reference: [YouTube: Undertale - Flowey \(Tutorial\)](#)

Rough Sketches:

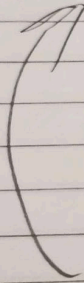

2: Bad Apple

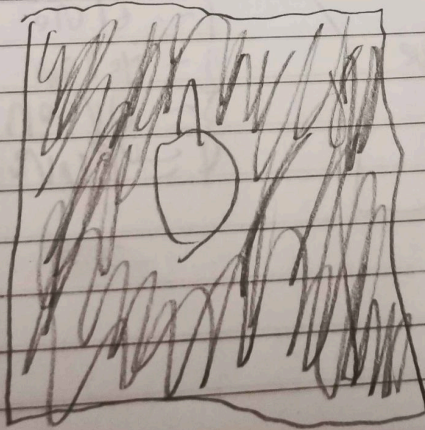

background: white

ket
press

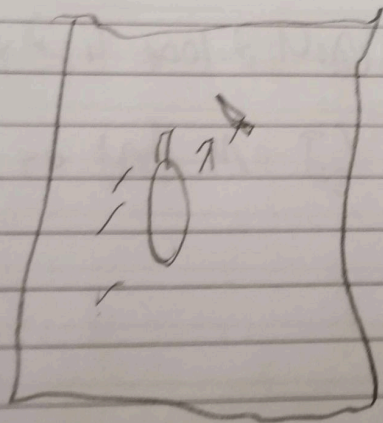

ket press

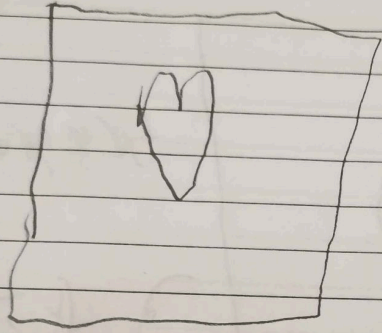

background: black

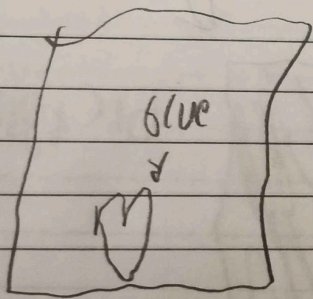

3. apple follows mango

(Apple follows mango?)

4: Under 70%
50011

Key press
1 = blue
2 = yellow
3 = green
4 = pink
